

I am for the retention of the "Do not call" law initiated by then Senator Codey. Before that, we had been receiving several telephone solicitation calls a day; sometimes from the same companies. It was annoying, especially since these calls are made around dinnertime. I began to recognize one repeated solicitor's voice; this person was so persistent, that when I said I was not interested in his product, he asked to speak to my husband. I am very relieved that we do not receive any more of these sales calls and do not care to have them start up again.
